Policy Agreed: September 2021

Review Date: September 2024

## Mobile Technologies Policy 2021 - 2024

## Introduction

Mobile technology devices may be a school owned/provided or privately owned smartphone, tablet, notebook / laptop or other technology that usually has the capability of utilising the school's wireless network. The device then has access to the wider internet which may include the school's learning platform and other cloud based services such as email and data storage.

The absolute key to considering the use of mobile technologies is that the pupils / students, staff and wider school community understand that the primary purpose of having their personal device at school is educational and that this is irrespective of whether the device is school owned/provided or personally owned.

The mobile technologies policy should sit alongside a range of policies including but not limited to the Safeguarding Policy, Bullying Policy and Acceptable Use Policy. Teaching about the safe and appropriate use of mobile technologies should be included in the online safety education programme.

## Potential Benefits of Mobile Technologies

Research has highlighted the widespread uptake of mobile technologies amongst adults and children of all ages. Web-based tools and resources have changed the landscape of learning. Students now have at their fingertips unlimited access to digital content, resources, experts, databases and communities of interest. By effectively maximizing the use of such resources, schools not only have the opportunity to deepen student learning, but they can also develop digital literacy, fluency and citizenship in students that will prepare them for the high tech world in which they will live, learn and work.

## Considerations

- The school Acceptable Use Agreements for staff, pupils and parents/carers will give consideration to the use of mobile technologies
- The school allows:

	School Devices			Personal Devices		
	School owned and allocated to a single user	School owned for use by multiple users	Authorised Device <sup>1</sup>	Student/Pupil Owned	Staff Owned	Visitor Owned
Allowed In School	Yes	Yes	Yes	No	Yes	No
Full network access	Yes	Yes	Yes	No	No	No
Internet Only	Yes	Yes	Yes	No	No	No
No Network Access	Access	Access	Access	No Access	No Access	No Access

- The school has provided technical solutions for the safe use of mobile technology for school devices:
  - All Apple school devices are controlled through the use of Mobile Device Management software
  - iPads are managed by Apple Configurator

---

<sup>1</sup>Authorised device – purchased by the pupil/family through a school-organised scheme. This device may be given full access to the network as if it were owned by the school

- Other devices are managed individually
  - Appropriate access control is applied to all mobile devices according to the requirements of the user (e.g. Internet only access, network access allowed, shared folder network access)
  - The school has addressed broadband performance and capacity to ensure that core educational and administrative activities are not negatively affected by the increase in the number of connected devices
  - For all mobile technologies, filtering will be applied to the internet connection and attempts to bypass this are not permitted
  - Appropriate exit processes are implemented for devices no longer used at a school location or by an authorised user. *These may include; revoking the link between MDM software and the device, removing proxy settings, ensuring no sensitive data is removed from the network, uninstalling school-licensed software etc.*
  - All school devices are subject to routine monitoring
  - Pro-active monitoring has been implemented to monitor activity
- When personal devices are permitted:
    - Personal devices are brought into the school entirely at the risk of the owner and the decision to bring the device in to the school lies with the user as does the liability for any loss or damage resulting from the use of the device in school
    - Personal devices should not be used in public areas, classrooms or when children are present. Only in extreme circumstances would this be allowed, with prior consent of head teacher, deputy or ICT Manager.
    - The school accepts no responsibility or liability in respect of lost, stolen or damaged devices while at school or on activities organised or undertaken by the school (the school recommends insurance is purchased to cover that device whilst out of the home)
    - The school accepts no responsibility for any malfunction of a device due to changes made to the device while on the school network or whilst resolving any connectivity issues
    - The school recommends that the devices are made easily identifiable and have a protective case to help secure them as the devices are moved around the school. Pass-codes or PINs should be set on personal devices to aid security
    - The school is not responsible for the day to day maintenance or upkeep of the users personal device such as the charging of any device, the installation of software updates or the resolution of hardware issues
- Users are expected to act responsibly, safely and respectfully in line with current Acceptable Use Agreements, in addition;
    - Visitors should be provided with information about how and when they are permitted to use mobile technology in line with local safeguarding arrangements
    - Users are responsible for keeping their device up to date through software, security and app updates. The device is virus protected and should not be capable of passing on infections to the network
    - Users are responsible for charging their own devices and for protecting and looking after their devices while in school
    - Personal devices should be charged before being brought to school as the charging of personal devices is not permitted during the school day
    - Devices must be in silent mode on the school site
    - Confiscation and searching (England) - the school has the right to take, examine and search any device that is suspected of unauthorised use, either technical or inappropriate.
    - The changing of settings (exceptions include personal settings such as font size, brightness, etc...) that would stop the device working as it was originally set up and intended to work is not permitted

- The software / apps originally installed by the school must remain on the school owned device in usable condition and be easily accessible at all times. From time to time the school may add software applications for use in a particular lesson. Periodic checks of devices will be made to ensure that users have not removed required apps
- The school will ensure that school devices contain the necessary apps for school work. Apps added by the school will remain the property of the school and will not be accessible to students on authorised devices once they leave the school roll.
- Users should be mindful of the age limits for app purchases and use and should ensure they read the terms and conditions before use.
- Users must only photograph people with their permission on school devices. Users must only take pictures or videos that are required for a task or activity. All unnecessary images or videos will be deleted immediately
- Staff owned devices should not be used for personal purposes during teaching sessions, unless in exceptional circumstances
- No camera watches are permitted in school
